A Canadian Writer’s Reference with 2009 MLA and 2010 APA Updates-Diana Hacker 2010-05-24 Click here to find out more about the 2009 MLA Updates and the 2010 APA Updates. A proven success, A Canadian Writer’s Reference, Fourth Edition, remains the easiest reference tool to use and understand. Updated with Canadian content and conventions, the fourth edition features new contributing authors who bring a wider range of teaching practice to the book — and who have shaped a writer’s handbook that serves an even broader and more diverse student body.

Handbook Bibliometrics-Rafael Ball 2020-12-07 Bibliometrics and almetrics are increasingly becoming the focus of interest in the context of research evaluation. The Handbook Bibliometrics provides a comprehensive introduction to quantifying scientific output in addition to a historical derivation, individual indicators, institutions, application perspectives and data bases. Furthermore, application scenarios, training and qualification on bibliometrics and their implications are considered.

<p>Schalm’s Veterinary Hematology-Douglas J. Weiss 2011-07-26 The long-awaited Sixth Edition of Schalm’s Veterinary Hematology has been revised and reorganized to increase accessibility and cohesiveness of the text. Topics are grouped within established disciplines in hematology, and outlines are now included at the beginning of each chapter. The book features new sections on Hematotoxicity and Quality Control and Laboratory Techniques, and includes expanded sections on Laboratory Animal Hematology, Species Specific Hematology, and Hematologic Neoplasia. With in-depth coverage on all aspects of the field, this comprehensive reference is an essential purchase for veterinary clinical hematologists, internists, and students.</p>

Body, Language, and Mind-Tom Ziemke 2007 The first volume of the two-volume set Body, Language and Mind focuses on the concept of embodiment, understood in most general terms as “the bodily basis of phenomena such as meaning, mind, cognition and language”. The volume offers a representative, multi- and interdisciplinary state-of-the-art collection of papers on embodiment and brings together a large variety of different perspectives, from cognitive linguistics, cognitive science, philosophy, psychology, semiotics and artificial intelligence. Being envisioned as a reader of sorts in theoretical and empirical research on embodiment, the book revolves around several core issues that have been addressed previously, to a large degree independently, in various disciplines. In particular the volume illustrates the diversity of notions of embodiment that has arisen in various disciplines over the last twenty years, and addresses the question how these different interpretations relate to each other, i.e. are they different aspects of or different perspectives on the same phenomena, or do they actually contradict each other? For this purpose, several aspects of cognition and language, such as phenomenal experience, perception, action, conceptualization, communication, meaning creation, social interaction and culture, are illuminated from the perspective of different theories of embodiment. The contributions are integrated through cross-connections between individual authors’ papers and through an introductory essay that identifies the different strands of research, the central issues that they share, and the synergies that can be gained from addressing embodiment from an interdisciplinary perspective.

Practice Guideline for the Treatment of Patients with Schizophrenia-American Psychiatric Association 1997 Developed by experts on schizophrenia and exhaustively reviewed by APA members, the "American Psychiatric Association Practice Guideline for the Treatment of Patients With Schizophrenia" provides therapists with a set of patient care strategies that will aid their clinical decision making. The guideline describes the best and most appropriate treatments available to patients with schizophrenia, including psychopharmacological treatments, ECT, and psychosocial and community interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding and management of this condition. This guideline will also help managed care organizations develop more scientifically based and clinically sensitive criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.

The Social Media Reader-Michael Mandiberg 2012-03-01 With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O’Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

Bread, Wine, Chocolate-Simran Sethi 2015-11-10 Award-winning journalist Simran Sethi explores the history and cultural importance of our most beloved tastes, paying homage to the ingredients that give us daily pleasure, while providing a thoughtful wake-up call to the homogenization that is threatening the diversity of our food supply. Food is one of the greatest pleasures of human life. Our response to sweet, salty, bitter, or sour is deeply personal, combining our individual biological characteristics, personal preferences, and emotional connections. Bread, Wine, Chocolate illuminates not only what it means to recognize the importance of the foods we love, but also what it means to lose them. Award-winning journalist Simran Sethi reveals how the foods we enjoy are endangered by genetic erosion—a slow and steady loss of diversity in what we grow and eat. In America today, food often looks and tastes the same, whether at a San Francisco farmers market or at a Midwestern potluck. Shockingly, 95% of the world’s calories now come from only thirty species. Though supermarkets seem to be stocked with endless options, the differences between products are superficial, primarily in flavor and brand. Sethi draws on interviews with scientists, farmers, chefs, vintners, beer brewers, coffee roasters and others with firsthand knowledge of our food to reveal the multiple and interconnected reasons for this loss, and its consequences for our health, traditions, and culture. She travels to Ethiopian coffee forests, British yeast culture labs, and Ecuadoran cocoa plantations collecting fascinating stories that will inspire readers to eat more consciously and purposefully, better understand familiar and new foods, and learn what it takes to save the tastes that connect us with the world around us.

Green Tribology-Michael Nosonovsky 2012-01-16 Tribology is the study of friction, wear and lubrication. Recently, the concept of “green tribology” as “the science and technology of the tribological aspects of ecological balance and of environmental and biological impacts” was introduced. The field of green tribology includes tribological technology that mimics living nature (biomimetic surfaces) and thus is expected to be environmentally friendly, the control of friction and wear that is of importance for energy conservation and conversion, environmental aspects of lubrication and surface modification techniques, and tribological aspects of green applications such as wind-power turbines or solar panels. This book is the first comprehensive volume on green tribology. The chapters are prepared by leading experts in their fields and cover such topics as biomimetics, environmentally friendly lubrication, tribology of wind turbines and renewable sources of energy, and ecological impact of new technologies of surface treatment.

Kenya Gazette- 1958-11-04 The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

<p>You’re A Genius-Steven S. Taylor 2015-08-06 If you want to excel at any art form, you have to master the craft. Artists spend years mastering their craft and then their whole lives working on that craft. The same is true for professional athletes. If you want to practice the art of leadership, you have to master the craft of leadership. What is the craft of leadership? Leadership is the craft of working with other humans in order to motivate and inspire them to complete their tasks and reach their goals. This is a “how-to” book for learning the techniques of reflective practice in the action science and action inquiry traditions in order to develop and practice that craft. The book explains how to use various tools, such as the Ladder of Inference, the Learning Pathways Grid, and the Change Immunity Map, for offline reflection and active experimentation in order to develop and practice the craft of leadership.</p>
<p>Recent Insights in Petroleum Science and Engineering-Mansoor Zoveidavianpoor 2018-02-07 This book presents new insights into the development of different aspects of petroleum science and engineering. The book contains 19 chapters divided into two main sections: (i) Exploration and Production and (ii) Environmental Solutions. There are 11 chapters in the first section, and the focus is on the topics related to exploration and production of oil and gas, such as characterization of petroleum source rocks, drilling technology, characterization of reservoir fluids, and enhanced oil recovery. In the second section, the special emphasis is on waste technologies and environmental cleanup in the downstream sector. The book written by numerous prominent scholars clearly shows the necessity of the multidisciplinary approach to sustainable development in the petroleum industry and stresses the most updated topics such as EOR and environmental cleanup of fossil fuel wastes.</p>
<p>Polyimides-Malay Ghosh 2018-02-06 Provides coverage on the full range of topics associated with polyimides, including structure, polymer fundamentals, and product areas. The text addresses both basic and applied aspects of the subject. It details the synthesis of polyimides, polyamideimides, and flourinated polyimides, explains the molecular design of photosensitive polyimides, and more.</p>

Phytopharmacy-Sarah E. Edwards 2015-02-17 Healthcare professionals, including doctors, pharmacists and nurses, are often confronted with patients who use over-the-counter (OTC) herbal medicinal products and food supplements. While taking responsibility for one’s own health and treatment options is encouraged, many patients use these products based on limited (and sometimes inaccurate) information from non-scientific sources, such as the popular press and internet. There is a clear need to offer balanced, well-informed advice to patients, yet a number of studies have shown that, generally, conventionally trained health practitioners consider their knowledge about herbal medicinal products and supplements to be weak. Phytopharmacy fills this knowledge gap, and is intended for use by the busy pharmacist, nurse, or doctor, as well as the ‘expert patient’ and students of pharmacy and herbal medicine. It presents clear, practical and concise monographs on over a hundred popular herbal medicines and plant-based food supplements. Information provided in each monograph includes:
• Indications
• Summary and appraisal of clinical and pre-clinical evidence
• Potential interactions
• Contraindications
• Possible adverse effects
An overview of the current regulatory framework is also outlined, notably the EU Traditional Herbal Medicinal Products Directive. This stipulates that only licensed products or registered traditional herbal medicinal products (THRs), which have assured quality and safety, can now legally be sold OTC. Monographs are included of most of the major herbal ingredients found in THRs, and also some plant-based food supplements, which while not strictly medicines, may also have the potential to exert a physiological effect.

<p>Glasscock-Shambaugh Surgery of the Ear-Michael E. Glasscock 2003 Glasscock-Shambaugh Surgery of the Earhas long been the reference of choice for otolaryngologists and neurosurgeons. In this fifth edition of the classic text, the authors have maintained its authoritative and practical character while enhancing its relevance by updating its contents to reflect the evolution of otology.Glasscock-Shambaugh Surgery of the Ear, 5/eanswers the need for a readable resource to the surgical management of diseases and disorders of the temporal bone, lateral skull base, and related structures. It includes expanded coverage of specific topics such as cochlear implants. This book will prove to be an ideal reference for the practicing clinician and the perfect study guide for the resident/fellow.</p>
<p>Encyclopedia of E-Health and Telemedicine-Cruz-Cunha, Maria Manuela 2016-05-04 Patients and medical professionals alike are slowly growing into the digital advances that are revolutionizing the ways that medical records are maintained in addition to the delivery of healthcare services. As technology continues to advance, so do the applications of technological innovation within the healthcare sector. The Encyclopedia of E-Health and Telemedicine is an authoritative reference source featuring emerging technological developments and solutions within the field of medicine. Emphasizing critical research-based articles on digital trends, including big data, mobile applications, electronic records management, and data privacy, and how these trends are being applied within the healthcare sector, this encyclopedia is a critical addition to academic and medical libraries and meets the research needs of healthcare professionals, researchers, and medical students.</p>
<p>Poverty, Inequality, and Democracy-Francis Fukuyama 2012-03 The rise of populism in new democracies, especially in Latin America, has brought renewed urgency to the question of how liberal democracy deals with issues of poverty and inequality. Citizens who feel that democracy failed to improve their economic condition are often vulnerable to the appeal of political leaders with authoritarian tendencies. To counteract this trend, liberal democracies must establish policies that will reduce socioeconomic disparities without violating liberal principles, interfering with economic growth, or ignoring the consensus of the people. Poverty, Inequality, and Democracy addresses the complicated philosophical and moral issues surrounding the distribution of economic goods in free societies as well as the empirical relationships between democratization and trends in poverty and inequality. This volume also discusses the variety of welfare-state policies that have been adopted in different regions of the world. The book’s distinguished group of contributors provides a succinct synthesis of the scholarship on this topic. They address such broad issues as whether democracy promotes inequality, the socioeconomic factors that drive democratic failure, and the basic choices that societies must make as they decide how to deal with inequality. Chapters focus on particular regions or countries, examining how problems of poverty and inequality have been handled (or mishandled) by newer democracies in Latin America, Eastern Europe, Africa, and Asia. Poverty, Inequality, and Democracy will prove vital reading for all students of world politics, political economy, and democracy’s global prospects. Contributors: Dan Banik, Nancy Bermeo, Dorothee Bohle, Nathan Converse, Alberto Diaz-Cayeros, Francis Fukuyama, Béla Greskovits, Stephan Haggard, Ethan B. Kapstein, Robert R. Kaufman, Taekyoon Kim, Huck-Ju Kwon, Jooha Lee, Peter Lewis, Beatriz Magaloni, Mitchell A. Orenstein, Marc F. Plattner, Charles Simkins, Alejandro Toledo, Ilcheong Yi</p>
<p>Social Media Marketing, Second Edition-Emi Moriuchi 2019-04-04 Faced with constant changes in consumer behavior, marketers are seeking various tools to promote and market their brands. Among those tools, the most impactful is consumer-generated content (CGC). CGC is viewed as consumers’ vote of confidence, which is a form of social proof. CGC allows consumers to be involved with the companies’ marketing strategy. Brands and companies have enabled consumers to be producers of original content, cocreators for an existing brand, and curators for trending ideas in the marketing place. The author explains why it is even more important today that brands need consumers’ voices to advocate their brands. In this lively and practical book, she uses theories to explain consumers’ psychology and offers practical examples of which social media platforms are conducive to CGC and why. In addition, she explains how consumers use CGC in different countries, the importance of influencer marketing, and ultimately teaches the strategy of using CGC effectively.</p>
<p>The Oxford Handbook of Laboratory Phonology-Abigail C. Cohn 2012 This book provides state-of-the-art coverage of research in laboratory phonology. Laboratory phonology denotes a research perspective, not a specific theory: it represents a broad community of scholars dedicated to bringing interdisciplinary experimental approaches and methods to bear on how spoken language is structured, learned and used; it draws on a wide range of tools and concepts from cognitive and natural sciences. This book describes the investigative approaches,disciplinary perspectives, and methods deployed in laboratory phonology, and highlights the most promising areas of current research.Part one introduces the history, nature, and aims of laboratory phonology. The remaining four parts cover central issues in research done within this perspective, as well as methodological resources used for investigating these issues. Contributions to this volume address how laboratory phonology approaches have provided insight into human speech and language structure and how theoretical questions and methodologies are intertwined. This Handbook, the first specifically dedicated tothe laboratory phonology approach, builds on the foundation of knowledge amassed in linguistics, speech research and allied disciplines. With the varied interdisciplinary contributions collected, the Handbook advances work in this vibrant field.</p>
<p>Public Access-Michael Bérubé 1994 In the years of the Reagan-Bush era, the controversy over “political correctness” erupted on American campuses, spreading to the mainstream media as right-wing pundits like Dinesh D’Souza and Roger Kimball prosecuted their publicity campaign against progressive academics. Michael Bérubé’s brilliant new book explains how and why the political correctness furore emerged, and how the right’s apparent stranglehold on popular opinion about the academy can be loosened. Traversing the terrain of contemporary cultural criticism, Bérubé examines the state of cultural studies, the significance of postmodernism, the continuing debate over multicultural curricula, and the recent revisions of literary history in American studies. Also included is Bérubé’s witty and self-deprecating autobiographical reflection on why interpretive theory has emerged as an indispensable part of education in the humanities over the past decade. Public Access insists that academics must exercise more responsibility towards the publics who underwrite but often misunderstand their work and its significance. Taken seriously as a potential audience, Bérubé argues, such publics can be weaned from their present inclination to believe the distortions and half-truths peddled by the right’s ideologues. The goal of such “public access” criticism is not just a better environment for teachers and scholars, but a world in which education itself achieves its proper place in a society committed to equality of opportunity and true critical thinking.</p>
<p>Sustainable Agriculture-Beyond Organic Farming-Sean Clark 2018-07-17 This book is a printed edition of the Special Issue "Sustainable Agriculture-Beyond Organic Farming" that was published in Sustainability</p>
<p>Atlas of Cities-Paul Knox 2014-08-24 Examines different cities from all over the world and looks at their physical, economic, social, and political structure, as well as their relationships to each other and where future urbanization might be headed.</p>
<p>Who is who at the Earth Summit, Rio de Janeiro 1992-Hans J. Keller 1992</p>

Frontiers of Science and Technology-Olfa Kanoun 2021-07-19 Selected extended papers from the Brazilian-German Conference on Frontiers of Science and Technology Symposium (BRAGFPOST), Potsdam 5.-10- October 2017 In October 2017 the 8th Brazilian-German Frontiers of Science and Technology Symposium (BRAGFOS) was held in Potsdam, Germany, gathering German and Brazilian researchers in the fields of Hybrid climate-control strategies, Multifunctional integration, Light-weight structures, Energy Harvesting, and Urban agriculture. This series of symposia, initiated in 2010, is the result of the collaboration between the Alexander von Humboldt Foundation (AvH) and the Brazilian Federal Agency for Support and Evaluation of Graduate Education (CAPES), and has a special format. Experienced specialists are giving overviews about their research which covers a wide area and making it accessible for specialists from other fields of science and technology.

Paul and Stephen-Francisco Cândido Xavier 2021-10-10 How did an old man’s trip to the market to buy fish and vegetables lead to a chain of cause and effect events that would change the religious face of the world forever? Who was Paul of Tarsus? A fanatical Pharisee and ruthless persecutor of Christians and the newborn Christian doctrine? Or a being predestined by divine choice, who converted upon receiving the gift of the apparition of Jesus in a glorious vision at the gates of Damascus? This book will show the reader the greatness of Paul of Tarsus, a courageous, daring and sincere man, who repented for his radical posture that culminated in the stoning of Christianity’s first martyr, Stephen, and who humbly undertook the accelerated revision of his ideas in answer to Jesus’ call. Amid persecutions, in-rmities, mockery, disillusionment, desertions by friends, stonings, beatings and imprisonments, he transformed his life into an example of labor through dozens of years of struggle by founding churches and rendering them assistance. At some point in our lives, we all receive Christ’s call. What have we done? Paul and Stephen will enable the reader to understand how love erases a multitude of wrongs.

<p>Encyclopedia of the Great Black Migration-Steven Andrew Reich 2006 Presents a collection of essays that explore the causes, experiences, and consequences of African American migrations during the twentieth-century.</p>

<p>Mennonite Life- 1984</p>

Breakthrough Problem Solving with Action Learning-Michael Marquardt 2012-05-16 Breakthrough Problem Solving with Action Learning explores why and how action learning groups have been so successful and creative in solving complex problems. The text begins by briefly reviewing the theories that undergird the effectiveness of action learning, philosophically situating readers and pointing them in the direction of related academic works that they may wish to explore. It then turns to stories of how organizations have employed action learning in solving specific, often-encountered business problems. These cases not only serve as real-world models for how action learning can be successfully employed, but also offer inspiration and potential starting points and guidelines for other businesses that face similar problems. The book concludes with a cross-case analysis that pinpoints the ingredients necessary for breakthrough problem solving via action learning.

Cohesion and Dissent in America-Carol Colatrella 1994-01-01 This book addresses one of the most important theories to arise in recent American literary scholarship. Developed over the past two decades, Sacvan Bercovitch’s ideas about the relationship of American cultural institutions to voices of dissent have repeatedly posed challenges to pervasive assumptions about American culture and the methods used by cultural critics and literary historians. The contributors to this book respond to different aspects of Bercovitch’s ideas by exploring a wide range of scholarly disciplines, including American, Chicano, Amerindian, African-American, Asian-American, feminist, comparatist, philosophical, legal, and critical studies. In addition to essays that focus on the theoretical backgrounds and implications of Bercovitch’s concepts, this book interrogates the uses of those concepts in the study of American literature. Work by a variety of American writers are analyzed: the Colonial poet Phillis Wheatly; nineteenth-century writers Hawthorne and Melville; modernists Pound and Eliot; contemporary authors John Barth, Norman Mailer, Arturo Islas, and John Yu; and philosophers William James and Stanley

<p>Phytopharmacy-Sarah E. Frontiers of Science and Technology-Olfa Kanoun 2021-07-19 Selected extended papers from the Brazilian-German Conference on Frontiers of Science and Technology Symposium (BRAGFPOST), Potsdam 5.-10- October 2017 In October 2017 the 8th Brazilian-German Frontiers of Science and Technology Symposium (BRAGFOS) was held in Potsdam, Germany, gathering German and Brazilian researchers in the fields of Hybrid climate-control strategies, Multifunctional integration, Light-weight structures, Energy Harvesting, and Urban agriculture. This series of symposia, initiated in 2010, is the result of the collaboration between the Alexander von Humboldt Foundation (AvH) and the Brazilian Federal Agency for Support and Evaluation of Graduate Education (CAPES), and has a special format. Experienced specialists are giving overviews about their research which covers a wide area and making it accessible for specialists from other fields of science and technology.

Paul and Stephen-Francisco Cândido Xavier 2021-10-10 How did an old man’s trip to the market to buy fish and vegetables lead to a chain of cause and effect events that would change the religious face of the world forever? Who was Paul of Tarsus? A fanatical Pharisee and ruthless persecutor of Christians and the newborn Christian doctrine? Or a being predestined by divine choice, who converted upon receiving the gift of the apparition of Jesus in a glorious vision at the gates of Damascus? This book will show the reader the greatness of Paul of Tarsus, a courageous, daring and sincere man, who repented for his radical posture that culminated in the stoning of Christianity’s first martyr, Stephen, and who humbly undertook the accelerated revision of his ideas in answer to Jesus’ call. Amid persecutions, in-rmities, mockery, disillusionment, desertions by friends, stonings, beatings and imprisonments, he transformed his life into an example of labor through dozens of years of struggle by founding churches and rendering them assistance. At some point in our lives, we all receive Christ’s call. What have we done? Paul and Stephen will enable the reader to understand how love erases a multitude of wrongs.

<p>Encyclopedia of the Great Black Migration-Steven Andrew Reich 2006 Presents a collection of essays that explore the causes, experiences, and consequences of African American migrations during the twentieth-century.</p>

Breakthrough Problem Solving with Action Learning-Michael Marquardt 2012-05-16 Breakthrough Problem Solving with Action Learning explores why and how action learning groups have been so successful and creative in solving complex problems. The text begins by briefly reviewing the theories that undergird the effectiveness of action learning, philosophically situating readers and pointing them in the direction of related academic works that they may wish to explore. It then turns to stories of how organizations have employed action learning in solving specific, often-encountered business problems. These cases not only serve as real-world models for how action learning can be successfully employed, but also offer inspiration and potential starting points and guidelines for other businesses that face similar problems. The book concludes with a cross-case analysis that pinpoints the ingredients necessary for breakthrough problem solving via action learning.

Cohesion and Dissent in America-Carol Colatrella 1994-01-01 This book addresses one of the most important theories to arise in recent American literary scholarship. Developed over the past two decades, Sacvan Bercovitch’s ideas about the relationship of American cultural institutions to voices of dissent have repeatedly posed challenges to pervasive assumptions about American culture and the methods used by cultural critics and literary historians. The contributors to this book respond to different aspects of Bercovitch’s ideas by exploring a wide range of scholarly disciplines, including American, Chicano, Amerindian, African-American, Asian-American, feminist, comparatist, philosophical, legal, and critical studies. In addition to essays that focus on the theoretical backgrounds and implications of Bercovitch’s concepts, this book interrogates the uses of those concepts in the study of American literature. Work by a variety of American writers are analyzed: the Colonial poet Phillis Wheatly; nineteenth-century writers Hawthorne and Melville; modernists Pound and Eliot; contemporary authors John Barth, Norman Mailer, Arturo Islas, and John Yu; and philosophers William James and Stanley

Phytopharmacy-Sarah E. Edwards 2015-02-17 Healthcare professionals, including doctors, pharmacists and nurses, are often confronted with patients who use over-the-counter (OTC) herbal medicinal products and food supplements. While taking responsibility for one’s own health and treatment options is encouraged, many patients use these products based on limited (and sometimes inaccurate) information from non-scientific sources, such as the popular press and internet. There is a clear need to offer balanced, well-informed advice to patients, yet a number of studies have shown that, generally, conventionally trained health practitioners consider their knowledge about herbal medicinal products and supplements to be weak. Phytopharmacy fills this knowledge gap, and is intended for use by the busy pharmacist, nurse, or doctor, as well as the ‘expert patient’ and students of pharmacy and herbal medicine. It presents clear, practical and concise monographs on over a hundred popular herbal medicines and plant-based food supplements. Information provided in each monograph includes:
• Indications
• Summary and appraisal of clinical and pre-clinical evidence
• Potential interactions
• Contraindications
• Possible adverse effects
An overview of the current regulatory framework is also outlined, notably the EU Traditional Herbal Medicinal Products Directive. This stipulates that only licensed products or registered traditional herbal medicinal products (THRs), which have assured quality and safety, can now legally be sold OTC. Monographs are included of most of the major herbal ingredients found in THRs, and also some plant-based food supplements, which while not strictly medicines, may also have the potential to exert a physiological effect.

Glasscock-Shambaugh Surgery of the Ear-Michael E. Glasscock 2003 Glasscock-Shambaugh Surgery of the Earhas long been the reference of choice for otolaryngologists and neurosurgeons. In this fifth edition of the classic text, the authors have maintained its authoritative and practical character while enhancing its relevance by updating its contents to reflect the evolution of otology.Glasscock-Shambaugh Surgery of the Ear, 5/eanswers the need for a readable resource to the surgical management of diseases and disorders of the temporal bone, lateral skull base, and related structures. It includes expanded coverage of specific topics such as cochlear implants. This book will prove to be an ideal reference for the practicing clinician and the perfect study guide for the resident/fellow.

<p>Encyclopedia of E-Health and Telemedicine-Cruz-Cunha, Maria Manuela 2016-05-04 Patients and medical professionals alike are slowly growing into the digital advances that are revolutionizing the ways that medical records are maintained in addition to the delivery of healthcare services. As technology continues to advance, so do the applications of technological innovation within the healthcare sector. The Encyclopedia of E-Health and Telemedicine is an authoritative reference source featuring emerging technological developments and solutions within the field of medicine. Emphasizing critical research-based articles on digital trends, including big data, mobile applications, electronic records management, and data privacy, and how these trends are being applied within the healthcare sector, this encyclopedia is a critical addition to academic and medical libraries and meets the research needs of healthcare professionals, researchers, and medical students.</p>
<p>Poverty, Inequality, and Democracy-Francis Fukuyama 2012-03 The rise of populism in new democracies, especially in Latin America, has brought renewed urgency to the question of how liberal democracy deals with issues of poverty and inequality. Citizens who feel that democracy failed to improve their economic condition are often vulnerable to the appeal of political leaders with authoritarian tendencies. To counteract this trend, liberal democracies must establish policies that will reduce socioeconomic disparities without violating liberal principles, interfering with economic growth, or ignoring the consensus of the people. Poverty, Inequality, and Democracy addresses the complicated philosophical and moral issues surrounding the distribution of economic goods in free societies as well as the empirical relationships between democratization and trends in poverty and inequality. This volume also discusses the variety of welfare-state policies that have been adopted in different regions of the world. The book’s distinguished group of contributors provides a succinct synthesis of the scholarship on this topic. They address such broad issues as whether democracy promotes inequality, the socioeconomic factors that drive democratic failure, and the basic choices that societies must make as they decide how to deal with inequality. Chapters focus on particular regions or countries, examining how problems of poverty and inequality have been handled (or mishandled) by newer democracies in Latin America, Eastern Europe, Africa, and Asia. Poverty, Inequality, and Democracy will prove vital reading for all students of world politics, political economy, and democracy’s global prospects. Contributors: Dan Banik, Nancy Bermeo, Dorothee Bohle, Nathan Converse, Alberto Diaz-Cayeros, Francis Fukuyama, Béla Greskovits, Stephan Haggard, Ethan B. Kapstein, Robert R. Kaufman, Taekyoon Kim, Huck-Ju Kwon, Jooha Lee, Peter Lewis, Beatriz Magaloni, Mitchell A. Orenstein, Marc F. Plattner, Charles Simkins, Alejandro Toledo, Ilcheong Yi</p>
<p>Social Media Marketing, Second Edition-Emi Moriuchi 2019-04-04 Faced with constant changes in consumer behavior, marketers are seeking various tools to promote and market their brands. Among those tools, the most impactful is consumer-generated content (CGC). CGC is viewed as consumers’ vote of confidence, which is a form of social proof. CGC allows consumers to be involved with the companies’ marketing strategy. Brands and companies have enabled consumers to be producers of original content, cocreators for an existing brand, and curators for trending ideas in the marketing place. The author explains why it is even more important today that brands need consumers’ voices to advocate their brands. In this lively and practical book, she uses theories to explain consumers’ psychology and offers practical examples of which social media platforms are conducive to CGC and why. In addition, she explains how consumers use CGC in different countries, the importance of influencer marketing, and ultimately teaches the strategy of using CGC effectively.</p>
<p>The Oxford Handbook of Laboratory Phonology-Abigail C. Cohn 2012 This book provides state-of-the-art coverage of research in laboratory phonology. Laboratory phonology denotes a research perspective, not a specific theory: it represents a broad community of scholars dedicated to bringing interdisciplinary experimental approaches and methods to bear on how spoken language is structured, learned and used; it draws on a wide range of tools and concepts from cognitive and natural sciences. This book describes the investigative approaches,disciplinary perspectives, and methods deployed in laboratory phonology, and highlights the most promising areas of current research.Part one introduces the history, nature, and aims of laboratory phonology. The remaining four parts cover central issues in research done within this perspective, as well as methodological resources used for investigating these issues. Contributions to this volume address how laboratory phonology approaches have provided insight into human speech and language structure and how theoretical questions and methodologies are intertwined. This Handbook, the first specifically dedicated tothe laboratory phonology approach, builds on the foundation of knowledge amassed in linguistics, speech research and allied disciplines. With the varied interdisciplinary contributions collected, the Handbook advances work in this vibrant field.</p>
<p>Public Access-Michael Bérubé 1994 In the years of the Reagan-Bush era, the controversy over “political correctness” erupted on American campuses, spreading to the mainstream media as right-wing pundits like Dinesh D’Souza and Roger Kimball prosecuted their publicity campaign against progressive academics. Michael Bérubé’s brilliant new book explains how and why the political correctness furore emerged, and how the right’s apparent stranglehold on popular opinion about the academy can be loosened. Traversing the terrain of contemporary cultural criticism, Bérubé examines the state of cultural studies</p>
